

NB!

Dear colleagues, we have received the following letter by the National Trust Eco Fund:

Regarding project: **Reducing the Emissions and Improving the Energy Efficiency of Todor Kableshkov Student Hostel Building and Facilities**

The National Trust Eco Fund /NTEF/ is expecting to close a deal for sale of AAUs. Within this deal the project you have submitted and that is already approved will be financed by the Board of NTEF under the National Green Investment Scheme. Following the signing of the contract for AAUs sale you will be invited with official letter to sign a contract for financing of your project.

To save time and to take advantage of the season, appropriate for carrying out construction works, we suggest you to start compiling the documentation, needed for the tender for project implementation.

The NTEF operates as preliminary control in announcing tender procedures and therefore has precise Guidelines for the procedures itself, as well as for the projects technical documentation that has to be entirely observed by all beneficiaries under the National Green Investment Scheme.

We suggest you to get acquainted in details with the information and to actively begin preparing the documentation for the tender procedures.

Sincerely,

Kamelya Georgieva, Chief Expert Projects

The project includes the following construction works of Todor Kableshkov Student Hostel 1”

- Thermal insulation of external walls
- Thermal insulation of roof
- Replacement of joinery
- Replacement of heating supply system
- Replacement of heating installation

The project amounts to BGN 1 278 319.97
